CLAIM AMENDMENT SHEET

1. (Previously Presented) A method of controlling insects, wherein at least a part of an insect to be controlled is exposed to an insect-adhering particulate composition, comprising:

including in the particulate composition at least one pesticide or insect behaviour modifying chemical and at least one magnetized magnetic material;

and locating the composition proximate a path of the insect.

- 2. (Previously Presented) A method as claimed in claim 1 wherein the particulate composition has an average particle size diameter in the range of from 2 to 100 µm.
- 3. (Previously Presented) A method as claimed in claims 1 or 2 wherein the magnetized magnetic material includes a ferromagnetic oxide.
- 4. (Previously Presented) A method as claimed in claim 1 wherein the particles adhere by a magnetic force to a surface.
- 5. (Previously Presented) A method as claimed in claims 1, 2, 3 or 4 wherein the composition comprises at least 10% by weight of hard magnetic material.
- 6. (Previously Presented) A method as claimed in claim 5 wherein the magnetized magnetic material includes strontium ferrite.
- 7. (Previously Presented) A method as claimed in claim 1 wherein the insect includes a cockroach.

Claims 8-22 (Cancelled)

- 23. (Previously Presented) In an insect trap which comprises a housing, a zone of the housing or a zone within the housing having a composition comprising electromagnetically sensitive particles, the improvement comprising including in the composition a magnetic material and at least one of a pesticide, pheromone, allomone, kairomone and parapheromone.
- 24. (Previously Presented) An insect trap as claimed in claim 23 wherein the zone of the housing includes a magnetically polarizable material.
- 25. (Previously Presented) An insect trap as claimed in claim 24 wherein the zone of the magnetically polarizable material comprises a removable insert placed within the housing.
- 26. (Previously Presented) An insect trap as claimed in claims 23 or 24 wherein the zone has a surface which is inclined to the horizontal.
- 27. (Previously Presented) An insect trap as claimed in claim 23 wherein the magnetic material includes a hard ferromagnetic oxide.
- 28. (Previously Presented) An insect trap as claimed in claim 23 wherein the magnetic material includes strontium ferrite.

3 .

- 29. (Previously Presented) An insect trap as claimed in claim 28 wherein the magnetic material includes at least 10% by weight of strontium ferrite.
- 30. (Previously Presented) An insect trap as claimed in claim 23 structured to trap cockroaches.
- 31. (Previously Presented) The method of claim 1 wherein the composition comprises approximately 10% by weight of strontium ferrite and approximately 90% by weight of a ferrosilicate.
- 32. (Currently Amended) An insect-controlling composition in particulate form, comprising:

an effective insect-adhering amount of a magnetized magnetic material, combined with at least one of a pesticide and an insect behaviour modifying chemical, and wherein the at least one of a pesticide and an insect behaviour modifying chemical includes at least one of a pesticide and an insect behaviour modifying chemical other than a food odor chemical.

- 33. (Previously Presented) The composition of claim 32 wherein the magnetized magnetic material includes a hard magnetic material.
- 34. (Previously Presented) The composition of claim 33 wherein the magnetized magnetic material includes a soft magnetic material.
- 35. (Previously Presented) A system for controlling insects including the composition of claim 32 and including a surface and wherein the magnetized magnetic material adheres to the surface by a magnetic force.
- 36. (Previously Presented) A system for controlling insects including the composition of claim 32 and including a trap, and wherein the magnetized magnetic material is situated proximate the trap.

Cancel Claims 37-39.

- 40. (Previously Presented) The composition of claim 33 wherein the magnetic material includes strontium ferrite.
- 41. (Previously Presented) The composition of claim 34 wherein the soft magnetic material includes ferrosilicate.
- 42. (Cancelled)
- 43. (Previously Presented) The composition of claim 34 wherein the ratio of hard material to soft material is approximately 1 to 9, by weight.
- 44. (Currently Amended) The composition of claims 32, 33 and \underline{or} 34 wherein the particles have an average particle size diameter in a range of from 2 to 100 μ m.
- 45. (Currently Amended) The composition of claims 32, 33 and or 34 wherein the magnetic material includes a ferrite.
- 46. (Previously Presented) The composition of claim 32 wherein the pesticide and an insect behaviour modifying chemical includes a pheromone.
- 47. (Previously Presented) The method of claim 1 wherein the pesticide or insect behaviour modifying

S:\Documents and Settings\Sue Shaper\My Documents\Shaper\BainSmith\50180 ROA 11-29-2006.doc

chemical includes a pheromone.

48. (Previously Presented) The method of claim 1 wherein the at least one pesticide or insect behaviour modifying chemical includes at least one pesticide or insect behaviour modifying chemical other than a food odor chemical.
